VOLUNTARY SERVICE CAMPAIGN: MAXIMA (A32) AND 240SX (S14) EMISSIONS LABEL

INTRODUCTION

Nissan has developed a modified emissions label for certain early production OBD II equipped 1995 240SX's and Maxima's in the State of **California only**. Owners of these vehicles in California are being sent the letter shown on page 2 of this bulletin along with a replacement label.

AFFECTED VEHICLES:

Early production 1995 240SX's and Maxima's in California only. Please verify the need for this campaign via Service-Comm.

Maxima	JN1CA21D*SW000301 - 056133
Maxima	JN1CA21D*SW600001 - 604037
240SX	JN1AS44D*SW000101 - 017371

IDENTIFICATION NUMBER

Nissan has assigned Campaign number **P4122** to this campaign.

DEALER RESPONSIBILITY

It is the dealer's responsibility to make the correction listed in this bulletin on all affected vehicles in dealer inventory, and on all retailed vehicles when requested by the owner.

REPAIR PROCEDURE

Clean the existing emissions label with "Prepsol" or equivalent to ensure it is free of any wax or grease, and install the new label directly over it.

Description	Part #	Quantity
1995 240SX CA Emissions Label	14805-70F13	1
1995 Maxima CA Emissions Label	14805-41U05	1

WARRANTY INFORMATION

Operation	OP Code	PNC	CS	CT	FRT
Install Emissions Label	P41221	P4122	9Y	99	0.2 hrs

OWNER'S LETTER

Dear Nissan Owner:

The State of California requires that vehicles located in certain parts of the state undergo a "Smog Check" every two years.

In order to ensure that the smog check is done quickly on your car, Nissan has prepared an underhood label with special instructions for the test station. Enclosed is the label which should be applied to the underhood of your vehicle.

The label should be placed directly over the existing emissions label. Be sure that you clean the old label of any wax, grease, or oil before applying the new label. If you prefer to do so, you may take your car to your Nissan dealer who will apply the new label at no charge to you.

We apologize for any inconvenience this may cause you, but we want to ensure that the correct procedure is used to check your Nissan's emission control system so that it does not needlessly fail the test.
